Article Submissions

Update Delete Unsubmit

Identifier	Type	Title	Status	Actions	Expires

START NEW SUBMISSION Submit a new paper using our refreshed v1.5 system. What changed?

Preflight Checklist for New Submissions

- If your submission is written in TeX you must upload your source. PDFs produced from TeX may be declined. Learn more about why TeX source is required
- Experienced authors recommend putting all the files you will upload into one folder before starting. Read how one author prepares a clean upload
- Common errors that slow down announcement include missing files or references. Double check for missing content before uploading. Learn more about common mistakes
- All announced content is archival and cannot be removed. Make sure that data you do not want archived is not part of your upload, for example TeX comments in your source. Read more tips from an arXiv author

Identifier	Primary Category	Title	Actions	Author
2506.11956	math.NA	Analysis of BDDC preconditioners for non-conforming polytopal hybrid discretisation methods		Y
2508.15320	math.NA	Reduced basis solvers for unfitted methods on parameterized domains		Y

2508.17705	math.NA	Energy minimisation using overlapping tensor-product free-knot B-splines	Y
2508.17687	math.NA	A convergence framework for energy minimisation of linear self-adjoint elliptic PDEs in nonlinear approximation spaces	Y
2409.15863	math.NA	A discrete trace theory for non-conforming polytopal hybrid discretisation methods	Y
2411.08064	physics.flu-dyn	Energy and entropy conserving compatible finite elements with upwinding for the thermal shallow water equations	Y
2411.04591	math.NA	Compatible finite element interpolated neural networks	Y
2403.14054	math.NA	Adaptive Finite Element Interpolated Neural Networks	Y
2410.13023	math.NA	STLCutters.jl: A scalable geometrical framework library for unfitted finite element discretisations	Y
2405.10478	cs.MS	GridapTopOpt.jl: A scalable Julia toolbox for level set-based topology optimisation	Y
2401.12649	cs.CE	Space-time unfitted finite elements on moving explicit geometry representations	Y
2311.14363	cs.CE	High order unfitted finite element discretizations for explicit boundary representations	Y
2303.13672	cs.CE	Neural Level Set Topology Optimization Using Unfitted Finite Elements	Y
2303.11617	math.NA	Adaptive quadratures for nonlinear approximation of low-dimensional PDEs using smooth neural networks	Y
2307.10605	math.NA	Model order reduction with novel discrete empirical interpolation methods in space-time	Y
2306.06304	math.NA	Finite element interpolated neural networks for solving forward and inverse problems	Y
2306.11213	math.NA	Efficient and reliable divergence-conforming methods for an elasticity-poroelasticity interface problem	Y
2206.03626	math.NA	Space-time unfitted finite element methods for time-dependent problems on moving domains	Y
2208.08538	math.NA	Stability and conditioning of immersed finite element methods: analysis and remedies	Y
2201.06632	math.NA	Robust high-order unfitted finite elements by interpolation-based discrete extension	Y
2207.10975	math.NA	Bound-preserving finite element approximations of the Keller-Segel equations	Y
2109.09983	math.NA	Conditioning of a Hybrid High-Order scheme on meshes with small faces	Y
2110.01378	math.NA	Geometrical discretisations for unfitted finite elements on explicit boundary representations	Y

2109.12818	cs.MS	The software design of Gridap: a Finite Element package based on the Julia JIT compiler	Y
2012.00280	math.NA	A robust and scalable unfitted adaptive finite element framework for nonlinear solid mechanics	Y
2106.13728	math.NA	Linking ghost penalty and aggregated unfitted methods	Y
2006.11042	math.NA	Robust and scalable h-adaptive aggregated unfitted finite elements for interface elliptic problems	Y
2006.05373	math.NA	The aggregated unfitted finite element method on parallel tree-based adaptive meshes	Y
1911.06792	math.NA	On differentiable local bounds preserving stabilization for Euler equations	Y
1910.01412	cs.MS	A user-guide to Gridap -- grid-based approximation of partial differential equations in Julia	Y
1907.03709	cs.MS	A generic finite element framework on parallel tree-based adaptive meshes	Y
1912.11487	math.NA	Monotonicity-preserving finite element schemes with adaptive mesh refinement for hyperbolic problems	Y
2001.07289	math.NA	Balancing domain decomposition by constraints associated with subobjects	Y
1911.11965	math.NA	Embedded multilevel Monte Carlo for uncertainty quantification in random domains	Y
1811.12372	cs.CE	Numerical modelling of heat transfer and experimental validation in Powder-Bed Fusion with the Virtual Domain Approximation	Y
1902.01168	cs.NA	Distributed-memory parallelization of the aggregated unfitted finite element method	Y
1908.00891	cs.MS	A tutorial-driven introduction to the parallel finite element library FEMPAR v1.0.0	Y
1901.08783	cs.CE	Scalable solvers for complex electromagnetics problems	Y
1810.03506	cs.CE	A scalable parallel finite element framework for growing geometries. Application to metal additive manufacturing	Y
1810.10314	math.NA	On a general implementation of h- and p-adaptive curl-conforming finite elements	Y
1805.01727	math.NA	Mixed aggregated finite element methods for the unfitted discretization of the Stokes problem	Y
1707.09783	cs.CE	Simulation of high temperature superconductors and experimental validation	Y
1709.09122	cs.CE	The aggregated unfitted finite element method for elliptic problems	Y
1703.06323	math.NA	Robust and scalable domain decomposition solvers for unfitted finite element methods	Y

1703.08466	math.NA	Nonlinear parallel-in-time multilevel Schur complement solvers for ordinary differential equations	Y
1708.01773	cs.CE	FEMPAR: An object-oriented parallel finite element framework	Y
1701.03477	cs.NA	Space-time balancing domain decomposition	Y
1606.08743	cs.NA	Monotonicity-preserving finite element schemes based on differentiable nonlinear stabilization	Y
1606.04283	math.NA	Convergence to suitable weak solutions for a finite element approximation of the Navier-Stokes equations with numerical subgrid scale modeling	Y

Author Information

You own 49 articles, have submitted 11 articles and are registered as the author of 49 articles.

Are you incorrectly registered as an author or a non-author of any articles you own?
If so use the Change Author Status form

Are there articles you are an author of on arXiv that are not listed here?
If you have the paper password use the Claim Ownership with a password form. Any paper owner can request the paper password using the the Recover Paper Password form.
If you do not have the paper password or are claiming multiple papers use the Claim Authorship form.
For more information please see our help page on authority records.

No public author identifier has been set for your account, see author identifier help or you may set a public author identifier.

Your ORCID iD is https://orcid.org/0000-0003-2391-4086.
